Professional Summary

I am a full-stack developer with 7 years of experience.

I was hired by many clients and several startups including Producement, Live Bela LLC ,and Tranzport. In the previous company, Producement, I worked on several fintech projects using Java, Spring framework.

I prefer working in an agile, fast-paced working environment remotely. because I believe autonomous, self-motivated, and fast-paced working is critical for a developer's career.

With solid knowledge and experience in PHP, Node.js, Python, HTML, CSS, Javascript, I always strive to produce a fully tested and efficient code based on perfect OOP design and strict coding style.

Now, I am interested in CI/CD using Github & Gitlab pipeline to various cloud platforms.

I can provide:

- Full-time work for 5 days per week
- Suggest new ideas and apply the latest technologies
- Real-time communication
- Lead development

My skills:

- .NET/C#, Python/Django & Flask, NodeJS/Koa, Loopback, MEAN, MERN stack, Mongoose, PHP/Laravel, Symphony,
- HTML, HTML5, CSS and various CSS architectures including SMACSS, BEM, OOCSS.
- Angular(any version), ReactJS, Nuxt, Vue.js, Next, Webpack, Babel, Javascript ES6
- Project Analysis
- Project Scheduling
- Test Automation
- Infrastructure Design
