Zhao **SongXun**

I am a full-stack developer with 7 years of experience.

Hired by many clients and several startups including Producement, Live Bela LLC ,and Tranzport, I worked on several fintech projects and improved KPIs of existing projects.

I prefer working in an agile, fast-paced working environment remotely. because I believe autonomous, self-motivated and fast-paced working is critical for a developer's career.

With solid knowledge and experience in PHP, Node.js, Python, HTML, CSS, Javascript, I always strive to produce a fully tested and efficient code based on perfect OOP design and strict coding style.

Now, I am interested in CI/CD using Github & Gitlab pipeline to various cloud patlforms.

I can provide:
- Full-time work for 5 days per week
- Suggest new ideas and apply the latest technologies
- Real-time communication
- Lead development
